H. E. SPENCER, M.P. GAVE ADDRESSES

H. E. SPENCER, M.P. BATTLE RIVER HOLDS GOOD MEETING AT IRMA

A well attended meeting was held in the Theatre at Irma on Friday, the 18th of October at 8 p.m. when Mr. Henry E. Spencer, the Federal member for Battle River gave an interesting address on the work of the past session. Mr. J. G. Clark was in the chair and in a few fitting words introduced the speaker. Mr. Spencer in his opening remarks reminded his hearers that he was making his annual trip through the constituency holding as many meetings as time would allow, thus carrying out his agreement made some years ago.

Mr. Spencer first gave the chief items in the "Speech from the Throne," which he termed the "Policy of the Government of the Day," the only item of which was criticized was that of immigration. He pointed out that the coming winter would be a serious one for unemployment.

In speaking of the budget he likened it to the ordinary business one, on a larger scale. He was glad to be able to tell his audience that Canada had a surplus last year of over 69 million dollars and that the National debt to this amount was reduced.

The revenue of the country was produced largely through the following taxes: Tariff, Excise and Income Taxes and in that order. Six of the largest items of expenditure were then given and commented upon, they were in round-millions as follows:

1. Interest on national debt 125 millions.
2. Pensions — 43 millions.
3. Post Office — 34 millions.
4. Public Works — 22 millions.
5. Defense — 20 millions.
6. Collection of Customs — 14 millions.

Altogether the estimates with money bills amounted to about 400 million dollars.

During the session which lasted four months and a week, Parliament passed no less than 34 Private bills, 64 Public ones and 238 Divorce cases.

The outstanding factors in the session according to the speaker were: (1) The criticism of the Postmaster General for practicing patronage in the Public Service. (2) The long discussion carried on in an effort to give Ontario her own divorce courts and thus relieve Parliament of much work which should be done elsewhere. (3) The valuable amendments made by Parliament to both the Dominion Election Act, the Grain Act, both of which were gone into fairly fully by Mr. Spencer.

During the address the speaker gave touches of history making an interesting connection of Parliamentary procedure with the past.

At the end of the speech the audience were invited to ask questions on Federal matters, or to make suggestions. Several very pertinent questions were then asked by those present and replied to by the speaker to their satisfaction.

HAS LATEST SHOE REPAIRING MACHINERY

Mr. Karmen, the shoe repair man at Wainwright is planning on moving into his new location, which will be opposite the new Hero Cafe, on Main Street, about the first of next week. Since Mr. Karmen has opened his temporary shop in Wainwright he has secured a complete line of the latest shoe repairing machinery and this week he has installed the very latest American sole stitching machine which now makes his shop one of the most complete in Alberta. Several other firms are about ready to move into their new buildings and each week now makes Wainwright look bigger and better than ever.

Spencer brothers are holding a big auction sale at their farm south west of Edgerton on Thursday, November 7th. This is one of the largest sales that has been held in this part of Alberta for some time and anyone wishing to secure anything in the line of live stock, machinery or farm equipment should make it a point to attend it.

LOST — Two wagon tires between Grattan Coulee and Ross school. Finder please notify A. W. Patterson, Irma, Alta.

LOCAL EVENTS JARROW DISTRICT

Mr. Knut Overby returned home from a trip to Vancouver.

Mr. Jenkins, teacher at Coal Springs, Mrs. Jenkins, Junior teacher here, and Miss Bowne of the Battle school all attended convention at Hardisty last Thursday and Friday.

The Community Club held another very successful dance on Friday, October 18th. The Loughheed orchestra furnished the music and the large crowd who attended seemed to enjoy it. There will be another dance on November 15th with the same music and with lots of novelties and fun makers. Don't miss this dance as every effort is being put forth to make it the best yet.

A "500" drive will be held in the hall on Tuesday evening, October 29. This is the first of a series of card parties to be given by the club this winter. Prizes will be given at each party and a grand prize at the end of the series. Admission will be twenty-five cents for all.

Mr. Gordon Bell who is teaching the Oxville school north of Chauvin motored here for the dance on Friday night and spent the week end with his sister, Mrs. Luxton.

Mr. Nate Bell of Innesfree and Miss Helen Halstead of Wainwright also spent the week end with Mr. and Mrs. Luxton.

Mr. and Mrs. J. D. Mannors, and family who have spent the summer motoring through Eastern Canada and the States returned to town last week and are staying with Mrs. Mannors' mother, Mrs. Marshall.

Mrs. Marshall and Marshall Burns who have spent the summer in the country returned to town this week.

Mr. W. Bridgeman and sons George and Stan motored to Edmonton this week.

Mr. and Mrs. McNoll returned to their home in Hayter on Tuesday. Miss K. McGregor had returned to Viking and resumed work after convalescing at her home here from a severe attack of flu.

The regular meeting of the Community Club was held in the hall on Tuesday evening. A good attendance made an interesting meeting. Six new members joined and delicious refreshments and a social hour was enjoyed after the business. The losing side of the membership drive will entertain at the next meeting which will be November 12th and a real good time is promised. Any one wishing to get in on this may do so by becoming a member of the club.

The Ladies Aid will be held at the manse on Wednesday, October 30th, instead of November 6th as plans are to be completed for entertainment.

GRAVELLED ROAD TO STRIKE POINT EAST OF C.P.R. CROSSING

Government surveyors are working east of Camrose on the survey for the new government highway. Information from a reliable source indicates that the new road will strike a point just east of the place where the C.P.R. crosses the present government road east of the C.N.R. tracks and will continue direct to the town of Killam. The surveyors are working in the territory from Killam to Bawlf at the present time. It is understood that the grade will be made next year with surface graveling to follow in two years' time. This trail will, it may be supposed, eventually carry through to the Alberta-Saskatchewan border.

NEWS ITEMS FROM KINSELLA

The Kinsella hotel changed hands last week. Jim Wong, of Irma is the new proprietor, and has employed Miss Jessy McBain of Irma as his assistant.

Knut Overby is back again after a three weeks visit to Vancouver. He reports conditions very poor there with many idle men and no work to be had.

Miss Bessy Scott has returned from a visit to Scotland, and has resumed teaching at the Albert school north of Irma.

Mrs. J. F. Murray returned last week from Ontario, where she has been visiting with her parents for the past three weeks. Mrs. Murray informs us that all is fairly well in the east.

Miss Dora Eckert left Saturday for Edmonton to enter the Royal Alexandra hospital as a nurse in training. Everett Donovan has accepted a position at Wainwright and left here last week taking his children with him.

Mrs. J. J. Overbo spent last week visiting with her sister Mrs. H. E. Edmy at Edmonton.

The funeral service of Mrs. Herriek who passed away on Wednesday, October 16th, aged 79 years was held on Saturday afternoon at her late home 16 miles northeast of Kinsella at 2 p.m. Rev. McNeal of Jarrov officiated and interment took place in the Irma cemetery. The pall bearers were Messrs. Claude Shippy, R. Rohrer, P. M. Blaine, Reuben Patterson, Ivan Curry and George Breckenridge. Beautiful floral tributes surrounded the casket from the family and immediate friends and testified to the high esteem in which she was held in this life. She leaves to mourn her loss besides her sorrowing husband five sons and two daughters.

Mrs. B. Wachter spent the week end in Edmonton.

Two cars of cattle and a carload of lambs were shipped from here on Monday.

The Whist drive which was held on Saturday evening last in Lee's hall was a complete success.

Mr. W. Kerns went to Wainwright on Sunday where he is singing for the Evangelistic services.

Miss Isabel Stronach who is teaching near Minburn spent the week end at her home here.

Mr. Joe Justik and Miss Marion Watson who are attending Camrose Normal spent the week end at their homes here.

Mrs. J. Ansell is spending a few days in Edmonton.

WIDOW WINS CLAIM IN DISPUTED WILL

An action arising out of the disposal of the estate of the late Dr. M. M. McLeod of Viking, between the widow, Mrs. Mabel McLeod and the sole beneficiary Mrs. Nora McLeod, widow of the deceased's cousin, was disposed of in the supreme civil court of Alberta Friday morning before Mr. Justice Walsh.

In a previous action on a question of dower rights of the widow, who had not lived with her husband for some years it was found that she was entitled to a life estate from the village property of the deceased, the village property having been the home when they lived together. Latterly however, Dr. McLeod had moved to the farm and as the Alberta act states that the wife is entitled to a life estate in the homestead of the deceased, which term is applied to city, town, village and country, the plaintiff contended that she was entitled to possession of the farm. This contention was sustained by Chief Justice Harvey of the court of appeal in a judgment handed down recently.

The action Friday morning was in connection with the claims of Mrs. Nora McLeod, the deceased's sole beneficiary in his will, who had lived on the farm since the doctor's death. Her claims were for expenses and compensation for administering the affairs of the farm. The court allowed her \$600 in this connection. Col. F. C. Jamieson K.C. appeared for the plaintiff and J. N. McDonald for the defendant—Journal.

CHURCH NOTICES AND ACTIVITIES

UNITED CHURCH NOTES

Services next Sunday will be as follows:

Strawberry Plains at 11 A.M.
Alma Mater at 3 P.M.
Irma at 7.30 P.M.

The Topic will be "The Seventh Commandment or the protection of the Home."

A Grand Halloween Concert and Dance will be held in Kiefer's hall on Monday, November 4th. Under the auspices of the Anglican Church. Artists from Wainwright, Mrs. G. Hudson and Mr. Adams, from Jarrov, Mrs. Waite, Mrs. Luxton and Mrs. Barton's instrumental trio, from Irma, Mrs. Roy White, Mrs. Pryce Jones, Mrs. Prothero, Miss Thurston, Mr. Inken and Miss M. E. Price, A.T.C.M. Sketch by Mrs. Adams, Mrs. Batchelor and Mrs. Steele.

The Irma and Jarrov Orchestras will be in attendance for the dance.

Everybody come and see the spoofs.

Admission to Concert — Adults 50c children 25c.

Admission to Dance — Gents 50c, Ladies free.

ROSEBERRY U.F.A. HOLD PLEASANT EVENING

Roseberry U.F.A. Local was visited on Thursday evening, October 17th by Mr. Aiken, Battle River Director on the U.F.A. Central Board. Mrs. B. Oldham president of the Roseberry Local presided. Mr. Aiken's address in which he outlined the principal departments of the central board's operations, was very highly appreciated by the audience which practically filled the school room. The address was followed by a short musical program in which Mrs. W. Walker and Mr. Aikens gave songs accompanied at the piano by Mrs. A. R. Harper. Miss Joan Walker recited "Rainbow's Giddy Doon". Miss Margaret Walker furnished very lively harmonica selections, while Miss Carmichael's gramophone filled in at intervals. The ladies contributed liberally in cakes and coffee which so quickened the pulses of those present that the floor was cleared and dancing until the wee small hours brought a very enjoyable evening to a close.

SALE AND REDEMPTION OF IMPOUNDED ANIMALS (Sec. 48)

Notice is hereby given under Section 48 of The Domestic Animals Act (Municipalities) that 1 Grey Gelding about 13 years old, no visible brand, weight 1400 lbs. w. impounded in the pound kept by R. Heaton, located on the S. E. 32-45-7-4th on Wednesday, the 18th day of September, A.D. 1929, and that the animal was sold on the 3rd day of October, 1929, to John Heaton of Fabyan.

— and that said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchaser of said animal.

For information apply to the undersigned.

R. J. TATE, Sec.-Treas. of the Municipality of Battle River No. 423, Post Office, Irma, Alta.

The Wastebasket

No wonder love is sweet, when it is mixed with so much taffy.

If it's a woman and the shoe pinches, she buys it.

Why is it that when one woman compliments another she always says: "She awfully clever, but—"

I should think you would be awful cold in that low cut dress," said a local fellow to his girl at the dance. "Why no. Don't you see I've got my winter beads on?" she replied.

Heard in a clothing store at To-field, Clerk: "You want a collar for your husband, ma'am. What size please?" Lady: "I don't know, but I can reach around on his neck with both hands."

"Our little girl likes to play serving make-believe tea and make-believe sandwiches," explained a lady neighbor to a local citizen, "Yes," he replied, "I've been to grown up affairs where they did the same thing."

"The trouble with most of our wives," said a lecturer at a special session of the poker club, "is that they don't want us to bring a friend home to dinner unless we notify them in advance, and if we notify them, they tell us not to bring him."

"Here, waiter, take this corn back. It isn't fit for a jackass to eat," said a travelling man in a Camrose restaurant Monday. "All right," said the waiter, "I'll get you some that is."

Heard at the poker party: "I always make it a point to tell my wife everything that happens." "Pooh! That's nothing. I tell my wife lots of things that never happen at all."

"I suppose you got those black and blue shins trying to play golf," said a local doctor as he prescribed a liniment for a patient. "You're wrong, doc," the man replied, "I got that in a bridge game playing opposite my wife as a partner."

Heard at the schoolhouse: Teacher: "Now Johnny, suppose you wanted to build a \$1,000 house and had only \$700 what would you do?" Johnny: "I s'pose I'd have to marry a girl with \$300."

"Well, dear, what do you think of it?" asked a lady visitor of a four-year old here who was gazing at her new hat. "Oh, I think it is all right," the little girl replied, "Mama said it was a perfect fright but it doesn't scare me any."

"There's a lady on the phone who says her husband promised to be home early," said the outer guard at men's lodge social here recently. All rising: "Excuse me a moment please."

Heard at the schoolhouse: Teacher: "Now, Willie, if James gave you a dog and David gave you a dog, how many dogs would you have?"

Willie: "Four."

Teacher: "Now, dear, think hard. Would you have four if James and David each gave you one?"

Willie: "Yes, I've got two dogs home."

OF COURSE THERE ARE MULES
— ALSO, BUT—

I hate to be a kicker, I always long for peace.

But the wheel that does the squeaking is the one that gets the grease.

It's nice to be a peaceful soul and not hard to please.

But the dog that always scratches is the one that has the fleas.

"I hate to be a kicker" means nothing to a show.

For the kickers in the chorus are the ones that get the dough.

The art of soft soap spreading is a thing that palls and stales.

But the guy that wields the hammer is the guy that drives the nails.

Let us not put any notions that are harmful in your head.

But the baby that keeps yelling is the baby that gets fed.

Chas. Wilbraham, Secretary, Irma.

"I've been watching that mechanic for the past fifteen minutes, and he certainly knew his business," said a citizen in front of a garage at Wainwright one day last week. "He didn't spill a drop of oil on the ground or over the fender. He put the hood down gently, fastened it securely and left no finger prints of grease on it. He wiped his hands on clean waste before opening the door, spread a clean cloth over the upholstery, meshed the gears noiselessly and then drove slowly and with caution into the street." "Yeah, that's his own car," replied his hearer.

If you have something valuable that you don't want and somebody else can use it, ad. in this paper will sell it for you. Try it.

What Is Education?

Educational policies and educational methods are today the subject of world-wide investigation, study and discussion, and particularly so in all English-speaking countries. Perhaps in no previous period has the subject of education received more attention from the masses of the people. To a greater extent than ever before parents are showing a real interest and deep concern. They are in a questioning and questioning mood, anxious to know whether accepted policies, systems and methods are productive of the best results.

It is also true that our schools and higher institutions of learning are costing more, and that the bills which have to be met by the taxpayers in order to provide and maintain their school systems are mounting year by year, and already constitute a large percentage of the annual tax levy. The vast majority of taxpayers do not object to this if—and this is the vital matter—they are obtaining decidedly better results in the education of the younger generation, and all that they have a right to expect from such increased expenditures.

The higher standard of living now so universal, as contrasted with thirty, forty, fifty years ago, has the effect of enabling parents to give their children high school and university training to an extent hitherto unknown. Tens of thousands of children now proceed to high schools, colleges, and colleges who not so long ago would have completed their academic training when they finished with public school. And the demand is for still greater facilities for secondary education, especially for those resident in rural areas and the smaller hamlets and villages scattered all over the land.

The question arises in the minds of many: Are all these young people being truly educated? Are the thousands of young men and women annually gathering from our universities with the right to add B.A., M.A., and other letters after their names educated in the truest and highest acceptance of the word? Or are they merely equipped with certain tools which many of them do not know how to use for their own advancement and the welfare of the human family?

Dr. George A. Coe, veteran educationist of Northwestern University, and recently retired from Teachers College, is convinced that a good education is education for good living. "What an absurdity it would be to certify as well-educated a youth who has never been socially awakened, well-educated, yet negligible as far as social well-being and social progress are concerned," Dr. Coe presents "ten points" by which a truly educated man can be detected, which are worthy of consideration:

1. An educated man is one who is trained to use the tools of human intercourse with readiness, precision, and accuracy. We mean, especially, language and the rudiments of number.
2. An educated man must be able to study and to think without guidance from others. He must be to some extent a thinker, not a mere imitator.
3. An educated man must have sufficient knowledge of nature to understand the main processes upon which human life and happiness depend.
4. An educated man knows enough of history to enable him to understand the main achievements of mankind.
5. An educated man is acquainted with the major resources for intellectual and esthetic enjoyment. He knows nature, literature, music, and the other arts sufficiently to choose superior to inferior enjoyments.
6. An educated man is marked by his interests as well as by his trained abilities. His attention is habitually attracted by significant rather than trivial objects, events, pursuits, and enjoyments.
7. An educated man must have not only this general culture, but also training for a specific occupation. Focalized activity that is directed toward some sort of efficiency has to be included.
8. An educated man must have toward his fellow-men the habitual attitudes that are commonly called ethical—such attitudes as honor and honesty, helpfulness and good-will, and co-operation.
9. An educated man must have loyalties to at least some of the important organizations and institutions of society, such as one's family, one's country, one's church.
10. If there is an inclusive meaning in life, the sort of education that I have been outlining should include some apprehension of, and feeling for, the divine; the ideally educated man will reverence God, and know how to worship.

Sherwood Eddy, who quotes these "ten points" by Dr. Coe, in his recently published pamphlet on the methods, purposes, and results of American colleges and universities suggests, in order to determine whether one's education is still alive and growing, and it should always be alive and growing; not a dead and finished thing, if it is real education,—answering the following questions:

1. Am I learning to study and to think?
2. Am I getting the knowledge that I need most? Am I learning to enjoy things that are most worth while? Am I acquiring esthetic appreciation of the significant values of life?
3. Am I living in the real world or in a corner apart? Am I learning to live by living now, by acquiring some vital knowledge of the world and its real problems, by actually facing them and beginning to try to solve them now? Or am I evading or postponing life, playing about with its trifles in a thoughtless and unreal academic world?
4. Am I progressing, standing still, or going backward?

The dome of St. Paul's Cathedral, London, England, weighs 64,000 tons. England has no mountains high enough to be perpetually covered with snow.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually synopsize acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour. Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because it is harmless, tasteless, does not neutralize many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful salts will never appeal to you. Go Alkali kills acid instantly. It may save a great many disagreeable hours. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

To Return German Property In Canada

Gross Value Of Holdings In Dominion About Thirteen Millions

German property in Canada taken over during the Great War will be returned as a result of The Hague settlement, to which the Dominion is a party.

Thomas Mulvey, K.C., custodian of enemy property, will leave shortly for Berlin to conclude the details of the transfer. The gross value of German property in custody in Canada is said to be approximately \$13,000,000, comprising real estate, bonds and corporate securities.

India Buys Canadian Grain

First Shipment To Be Made From Montreal Shortly

Thirty-two thousand quarters of grain will be shipped from Montreal to India in the near future at a parrying charge of 22s. 6d. per ton. It is announced by Thomas Harding and Son, agents of the S. S. Zurichmoor. It is believed this will be the first consignment of Canadian grain ever shipped to India. The local agents have not yet been notified of the particular type of grain required.

WAS ALWAYS AILING NEVER FELT WELL

Health Restored Through the Use Of Dr. Williams' Pink Pills

"I am one of the many who have found new health through the use of Dr. Williams' Pink Pills," says Mrs. Everett Dove, South Nelson, N.B. "For some years I never felt well, and at times was so weak that I would be confined to bed at the very best. I was in an ailing condition and found it difficult at all times to do my household work. I was subject to headaches, poor appetite, breathless at the least exertion, and very pale. Before Dr. Williams' Pink Pills were recommended to me I had tried several medicines and felt that I would always be an invalid. A friend strongly urged me to take Dr. Williams' Pink Pills, and finally I consented to do so, but without much hope that they would help. Where other medicines had failed. But in this, to my joy, I was mistaken. I had not been taking the pills very long when I began to feel better. As I continued their use I found my appetite improving, I slept better at night, and my strength was gradually returning. I continued taking the pills for several months, when I again found myself a well woman, and I believe that had it not been for Dr. Williams' Pink Pills I would today be a helpless invalid. The pills have since been taken by others in our family with the same beneficial results. I strongly urge every weak woman to try the great health-building medicine."

If you will send your name and address to Dr. Williams' Medicine Co., Brockville, Ont., a little book, "Building Up the Blood," will be mailed you postpaid.

You can get these pills through any medicine dealer or by mail at 50c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Egg-Marketing Record

New records for the co-operative marketing of eggs in the western provinces have been established for the first eight months of 1929. To August 31, the Canadian Poultry Producers' Association, the central selling agency for the western provinces, has handled more than 7,000,000 dozen eggs.

As a verifuge an effective preparation is Mother Graves' Worm Exterminator, and it can be given to the most delicate child without fear of injury to the constitution.

To Exchange Ambassadors

Great Britain Has Entered Into Agreement With Russia

Great Britain and Russia have agreed to an exchange of ambassadors, thus paving the way for full resumption of trade and commercial relations between the two countries. The agreement, which is subject to parliamentary approval in England, was reached in a secret meeting at Leves, England, between Right Hon. Arthur Henderson, foreign secretary of Great Britain, and Russian ambassador, Valerian Doyalsky, who came from his Paris stop.

The Oil Of Power.—It is not claimed for Dr. Thomas' Electric Oil that it will remedy every ill, but its uses are so various that it may be looked upon as a general pain killer. It has achieved that greatness for itself and its excellence is known to all who have tested its virtues and learned by experience.

Warden (to prisoner): "You say you want a key. What in thunder are you going to use it for?" Inmate: "I want to sleep home at night—I was only sentenced to 30 days in jail."

Milard's Liniment for Warts.

Children's Colds

Best Treated Externally

That's why modern mothers prefer Vicks—It cannot upset delicate stomachs. Rubbed on throat and chest, it acts two ways at once:

(1) Its healing vapors, released by the body heat, are inhaled direct to the air passages;

(2) It "draws out" the soreness like an old-fashioned poultice.

Real English Pantomime

Colossal British Production, "Humpty Dumpty," Coming Soon

Old Country folk who have long craved to see a real English pantomime, and Canadians who have heard so much of these sumptuous musical entertainments from friends will welcome the news that at last a British producer, Mr. Philip Rodway, has had the courage to send us one of these colossal productions in "Humpty Dumpty," which will be seen at the Grand Theatre, Regina, for three nights, and Wednesday matinee, commencing October 21st.

When "Humpty Dumpty" was presented in Toronto, it was an instantaneous hit which is proven by the following from the Toronto Daily Telegram.

"This season's triumphant march of the British theatre into the hearts of Canadians made notable progress last night when a large audience at the Princess Theatre acclaimed Philip Rodway's presentation of the Birmingham Pantomime Company's "Humpty Dumpty." A story drawn from fairyland it is, but one that appeals to young and old, a mass of good cheer and optimism, with new faces and new songs, diverting, wholesome, fascinating.

"Wee Georgie Wood, of course, is the outstanding star. The diminutive player is a gifted actor, his excellent magnetism with the rare ability to change a crowd scene from merriment to pathos merely by altering the expression of his face or the tone of his voice. He can build up mass interest in some conceit or other till it soars high, and then crash it down in a heap with a lightning-bomb of irresistible wit. His smile is impish in its compelling good humor. Then, in an instant, he adopts a mask of sadness, and the composite face of all the little boys ever lost in snowstorms tears at the heart-strings of the audience. His part is that of "Humpty Dumpty," a nondescript lad out of a broken egg. Few do so well as he in the process of being washed at bedtime by his mother. Later as a Scotch laddie with a dog, his antics are inimitable and his Highland accent, by the way, worthy of Lauder himself. Furthermore, Al Johnson never knew as well as "Wee Georgie" how to talk to an audience in intimate fashion. It is some feat to get a Toronto theatre singing unaccompanied songs. "Wee Georgie" did it last night at the Princess."

Two pieces of broken Indian pottery, the first reported found in the region, were recently discovered in Rocky Mountain National Park.

Unity south-westerly branch, 50 miles. Grading on this branch is about 45 per cent. completed and a material yard has been laid out at Unity where track laying material is now being assembled.

Unity south-westerly branch, 50 miles. Grading on this branch is about 45 per cent. completed and a material yard has been laid out at Unity where track laying material is now being assembled.

Hamaruka—Scapa branch, 41 miles, westerly from Hamaruka, Alberta, to a junction with the Endiang subdivision at Scapa. Grading on the branch is about 65 per cent. completed and a material yard has been laid out at Scapa where track laying material is now being assembled.

St. Walburg—Bonnyville branch, 126 miles. Grading on this branch is about 10 per cent. completed and a material yard has been constructed at Bonnyville for the assembling of track laying material.

Ridgedale easterly branch, 30 miles. Tenders for clearing, grading and installation of culverts on this branch are now being asked and a start will be made this fall if weather conditions permit.

Bulwark easterly branch, 25 miles. No work will be done on this branch before next year.

Alliance south easterly branch, 95 miles. No work will be done on this branch before next year.

Works In Reverse

The butterfly is an insect whose heart beats backwards as well as forwards, according to Prof. John H. Gerould. The beat starts at the back and travels forward, squeezing the blood on ahead of it. After repeated times several times the heart will pause and then a beat will start at the forward end, forcing the blood in the opposite direction.

The walking speed of the average man is about three miles an hour.

Splendid Progress Made on Prairie Branch Line Project

Work Being Rushed On 418 Of The 568 Miles Authorized

Construction on the branch lines programme of the Canadian National Railways on the prairies has proceeded in a particularly satisfactory manner during the summer, according to an announcement made by H. A. Dixon, chief engineer, western lines of the company. Work is in progress in practically every section of the programme authorized by Parliament at its last session, stated Mr. Dixon.

In Saskatchewan and Alberta a total of 568 miles of new line was authorized, and of this mileage work is progressing on 418 miles.

On the Aberdeen-Melfort line, 25 miles of steel already have been laid in an easterly direction from the junction with the Cudworth subdivision at Wakaw. In a number of cases grading is as much as 70 per cent. completed. Mr. Dixon says that there will be a continuance of this work on all branch lines as long as weather conditions permit.

Although the programme was one of the heaviest ever undertaken by the company, only 156 miles have had no work done on them. However, plans are prepared to begin work on this mileage next year, and the assurance is given by Mr. Dixon, that the programme will be fully completed within the three year period defined by parliament.

In addition to this programme the company has also succeeded in putting steel into the Sherbrooke-Gordon line over the branch line authorized last fall, and is practically completing the first lift of ballast to Fort Churchill over the 90 miles of grade upon which a skeleton track was laid last winter. The engineers in charge expect to have this piece of track in such shape early next summer, that through freight and passenger trains will be able to operate between The Pas and Churchill by the end of July at the latest.

Work done on the prairie branch lines during the summer, this work including only the three year programme, 1929-32, may be summarized as follows:

Melfort—Aberdeen branch, 88 miles. Grading 70 per cent. completed, and 25 miles of steel have been laid easterly from the junction with the Cudworth subdivision at Wakaw. Balancing operations are now proceeding on this portion of the track.

Mayer south westerly branch, 50 miles. Grading on this branch is about 20 per cent. completed. A material yard has been constructed at Mayer for the purpose of assembling track laying material.

Neldpath-Swift Current branch, 30 miles. Grading on this branch is about 60 per cent. completed and a material yard has been constructed at Neldpath for the assembling of track laying material.

Hamaruka—Scapa branch, 41 miles, westerly from Hamaruka, Alberta, to a junction with the Endiang subdivision at Scapa. Grading on the branch is about 65 per cent. completed and a material yard has been laid out at Scapa where track laying material is now being assembled.

Unity south-westerly branch, 50 miles. Grading on this branch is about 45 per cent. completed and a material yard has been laid out at Unity where track laying material is now being assembled.

Hamlin-Glenhush branch, 33 miles. Grading on this branch is about 15 per cent. completed and a material yard is being built at Hamlin.

St. Walburg—Bonnyville branch, 126 miles. Grading on this branch is about 10 per cent. completed and a material yard has been constructed at Bonnyville for the assembling of track laying material.

Ridgedale easterly branch, 30 miles. Tenders for clearing, grading and installation of culverts on this branch are now being asked and a start will be made this fall if weather conditions permit.

Bulwark easterly branch, 25 miles. No work will be done on this branch before next year.

Alliance south easterly branch, 95 miles. No work will be done on this branch before next year.

Works In Reverse

The butterfly is an insect whose heart beats backwards as well as forwards, according to Prof. John H. Gerould. The beat starts at the back and travels forward, squeezing the blood on ahead of it. After repeated times several times the heart will pause and then a beat will start at the forward end, forcing the blood in the opposite direction.

The walking speed of the average man is about three miles an hour.

Acids in Stomach Cause Indigestion

Medical authorities state that nearly nine-tenths of the cases of stomach trouble, indigestion, sourness, burning, gas, bloating, nausea, etc., are due to an excess of hydrochloric acid in the stomach. The delicate stomach lining is irritated, and hydrochloric acid, a food source, causing the disagreeable burning on every stomach ailment.

In such cases and may do real harm. Try taking—safe—acid digestive aids and instead of from any drugstore, some Bismarck Magnesia and take a little in water right after eating. This sweetens the stomach, prevents the formation of excess acid and there is no sourness, gas or pain. Bismarck Magnesia (in powder or tablet form—never liquid or milk) is harmless to the stomach, inexpensive to take and the most efficient form of magnesia for stomach troubles. On hand at all drugstores of people who enjoy their meals with no more fear of indigestion.

May Emblazon Honors On Regimental Colors

Canadian Regiments Have Received Sanctions From King George

Final approval has now been secured from His Majesty the King for the emblazoning on the regimental colors of Canadian permanent and non-permanent active militia units, the honors won by these regiments during the Great War. At present 68 regiments have been given definite sanction to embroider these honors on their colors, and in due course the remainder of the militia will receive authority according to the qualifications of the regiments concerned.

Thus a question that has consumed several years and that has involved little short of scanning the war records of almost every one of the 600,000 Canadians who served in the Canadian Expeditionary Force, is settled once and for all. Every one of the "fighting" battalions of the Canadian Corps—50 in number—is perpetuated in the non-active militia (exclusive of the three infantry regiments of the permanent force). The perpetuating unit.

Four militia regiments in Manitoba, five in Saskatchewan, and five in Alberta, have been given authority to carry the battle honors won by their corresponding Canadian Corps battalions.

If Miller's Worm Powders needed the support of testimonials, they could be got from mothers who know the great virtue of this excellent medicine. But the powders will speak for themselves in such a way that there can be no question of them. They act speedily and thoroughly, and the child to whom they are administered will show improvement from the first dose.

Sunspots Vary in Number

Sunspots vary in number in a period of average length of eleven and a half years. The weather is found to vary along with these changes in the sun, in some localities quite definitely. As a result living conditions vary with consequent effects on birds, animals, trees, grain and, and economic conditions.

An Oil Without Alcohol.—Some oils and many medicines have alcohol as a prominent ingredient. A judicious mingling of six essential oils compose Dr. Thomas' Electric Oil, and there is no alcohol in it, so that its effects are lasting.

Poor Year For Tree Seed

The season of 1929 was a poor one for the collection of forest tree seed throughout the western provinces, and orders received by the Forest Service of the Department of the Interior, Ottawa, for seed could be filled only in part.

Good Agricultural Land To Be Found In H. B. Ry. Area Says Report Of Federal Expert

That the clay belt of Ontario, now one of the new areas attracting thousands of settlers, extends into northern Manitoba, and there is a very large territory of good agricultural land contiguous to the Hudson Bay Railway, are the outstanding features of a report made to the Federal Department of Agriculture by an expert agriculturist, who made an inspection of this section of Manitoba last summer.

The expert, whose name is withheld, but who is an officer in the experimental farms branch of the department, began his survey of the northern territory at Hudson Bay Junction and proceeded as far north along the Hudson Bay road as the contractors would allow him to go. He reports that between the Junction and The Pas, the terrain is very wooded and there is no settlement. Further north, the terrain is very wooded and there is no settlement. Further north, the terrain is very wooded and there is no settlement.

Further north along the line, the expert was stopped at Mile 445, Deer River, and then turned back. Summarizing the situation, the report states: "From Mile 137 to 327, the line passes through the clay belt and there is much good soil not hampered by rock, that, once drained from muskeg, will make good agricultural territory. Most of the mining people think a person is insane who appears in the north country to seek agricultural possibilities. Notwithstanding this lack of faith, I am convinced that when the time comes when this territory is needed for settlement the possibilities are there."

It is added that there is a great opening for dairy farming in this area and that cows are badly needed by those who are beginning to farm. **Western Canada Has Many Saline Lakes** Scores contain deposits which may be valuable commercially. Search for potash during the Great War first directed serious attention upon the saline lakes of Saskatchewan. Geologists and chemists spent many months examining the commercial possibilities of these lakes and since then progress has been made in the sodium sulphate industry.

A half million dollar plant was built at Expanse, near Lake Johnston, and more recently plans for another half million dollar sodium sulphate venture directed attention on the Horseshoe Lake deposits, 60 miles to the south of Moose Jaw.

Recent investigations by officials of the Federal Department of Mines show that scores of saline lakes in Western Canada contain deposits which warrant examination for commercial possibilities. Most of these lakes are in Saskatchewan, but some exist in other Western provinces. A significant point about the deposits of hydrous sodium sulphate examined is that in 21 lakes alone more than 115,000,000 tons of hydrous salts are available. Regina Daily Post.

"Mountie" Likes Arctic Sergeant Anderson, Home On Furlough, Says It Is the Only Life. Sgt. P. Anderson, of the Royal Canadian Mounted Police, is spending his first furlough out of the Arctic in nine years. He arrived at Vancouver on the police schooner, St. Roch, which has been following the line of her duty on Herschel Island east to Cambridge Bay for the past fifteen months. Sergeant Anderson has spent altogether 17 years in the Arctic service. He said he would go back. "It's the only life," he declared. "It gives you plenty of freedom, lots of amusement and a good outdoor existence." The sergeant's opinion takes him across the unpopulated wastes of Canada's northern territories under all circumstances of weather and time, acting in every capacity for the laws of the Dominion.

The St. Roch is a two-masted auxiliary schooner, 90 feet long, built for the Royal Canadian Mounted Police Arctic Service.

Why "Horse" Chestnut Botanist Tells Two Reasons For Name Given To Tree. How did the chestnut tree come by its name? Gerarde, the famous sixteenth century botanist, declared that the horse chestnut was so designated because "the people in the eastern counties do with its fruit cure their horses of the cough, shortness of breath, and such like diseases." Another is that the name is applied because of the curious fact that where the leaf stem breaks from the twig there appears a small horse shoe mark, complete even to the nails.

Alberta's Oil Production Production of oil in Alberta in 1928 amounted to 410,623 barrels of crude naphtha, 70,734 barrels of light crude, and 8,174 barrels of heavy crude, 489,531 barrels in all, an increase of 47 per cent. over the total output for 1927. Over 14,000,000 M cubic feet of natural gas was consumed in Alberta in 1928.

"Daddy, didn't they have radios when you were a boy?" "No, son." "Didn't you get peeved when you tried to buy one and couldn't?" "A woman who suffers untold agony is an exception to the rule."

Rescuing Skipper: "Didn't you have any provisions?" Fishermen: "Yes, but we drank them before the wind got up." — Smith's Weekly, Sydney.

Co-Operative Egg Marketing

Placing Poultry Production In Manitoba On A Profitable Basis. Membership in the Manitoba Co-operative Poultry Marketing Association Ltd., Hartney, Manitoba, has increased during the seven years it has been operating from 1,000 to 11,000.

The annual report of the management of the association states "co-operation intelligently and efficiently applied to the marketing of poultry products has been instrumental in placing poultry production in Manitoba on a profitable basis and establishing another permanent branch of agriculture on many Manitoba farms."

Last year 34,000 birds, weighing 141,013 pounds, live weight, were marketed so as to bring to the producers from 13 to 15 cents per pound net. Total sales amounted to \$19,788. Culling of the live poultry from the farm flocks is conducted under the supervision of the extension service of the Provincial Department of Agriculture.

Dressed poultry was shipped during the year from 104 points. The weight of the dressed birds was 1,231,326 pounds, and their sales value amounted to \$356,998. The number of cars of dressed poultry forwarded to market was 73 for 1928, compared with 62 for 1927, and 5 for 1922, the year in which the association began business.

Six egg stations were operated during the year, and 135 cars of eggs were sent to market. These shipments amounted to 54,172 cases with a sales value of \$489,880. Carload shipments of eggs were 103 in 1926; 113 in 1927; and 135 in 1928.

Average net prices to the producers ranged from 19 cents a dozen for cranks to 27 cents for extras.

Many Customers For Canadian Flour

Of Eighty-Three Countries, Great Britain Is Largest Buyer

Eighty-three countries of the world are customers for Canadian wheat and flour, according to a recent report. Great Britain was the largest. During 1928, more than 94,000,000 bushels of wheat were ground as commercial flour in Canadian mills, which was an increase of eight million bushels over the previous year. Flour produced totalled 20,900,000 barrels, or an increase of nearly two million barrels over the previous year.

Finds Imprint Of Large Foot The imprint in stone of an enormous human foot, indicating a type of prehistoric man of which no trace has hitherto been found, was claimed to have been discovered near the Limpopo River, by an Italian scientific expedition, Basile, indicating that the man must have been of huge stature, indications were present of several ape-like characteristics.

If a man leaves his lunch untouched it's because he's not hungry. If his little son does the same thing it's just natural wickedness.

LADIES' OPEN GOLF CHAMPIONSHIP

The photographs here show three prominent in the ladies' open golf championship matches at Ancaster golf course, Hamilton, They are: (1) Miss Doris Virtue, Montreal; (2) Mrs. B. P. Bell, Winnipeg, who defeated Miss Ada MacKenzie; and (3) Miss Virginia Wilson, Chicago, who failed to retain her title.

BEIRTRAM S. SMITH

Superintendent, Colonization Construction Branch, Canadian Pacific Railway. Of the 23 years during which Mr. Smith has been connected with the railway, 18 have been spent in farm development work. Of the buildings erected on 1500 improved farms that the Company has developed in this period, ninety-five per cent. have been under his supervision. The Colonization Construction Branch this year has charge of the construction of cottages under the scheme in operation between the Overseas Settlement Committee of the British Government and the Department of Colonization and Development, Canadian Pacific Railway.

Grain For The Orient

Bulk, Of Peace River Exportable Surplus Going To East

Preliminary estimates place the 1929 exportable surplus of the Peace River wheat crop at 16,000,000 bushels, and it is believed that a large percentage of this will be shipped to Oriental markets via Pacific Coast ports. Naoki Iwasaki, representative of a Japanese flour mill company, recently visited the Peace River country and it is estimated that his company will make large purchases from several companies operating elevators in the northern district. Mr. Iwasaki's company purchases annually about 15,000,000 bushels of wheat and operates 12 mills in Japan.

The Vanishing Windmill

Once Landmarks Of Berlin Now Only Two Left

Among Berlin's vanishing landmarks are its windmills and water wheels. Once numerous, there are now only two left. In the heart of the Tiergarten stands the remains of a water wheel, which is said to have been built more than 300 years ago, but which was last operated in 1837. Twenty feet off the road to the suburb of Zehlendorf is the last surviving windmill of the capital. It is still in fairly good condition, although it has been several decades since its huge blades last turned lazily in the wind.

The weight of whales ranges all the way from a few hundred pounds to 140 or 150 tons. The heaviest whale on record weighed 147 tons.

Spread Of English Language Since Close Of Great War Presents Interesting Phenomenon

One of the most arresting phenomena of these times is the spread of the English language, particularly since the great war. At present English is the current tongue of some two hundred millions of people. With the rapid expansion of the United States, as well as that of our own Dominions and Dependencies, its overwhelming domination seems assured within a few decades.

In Northern, Central and South-Eastern Europe parents are clamoring to have their children taught English, often with an eye to future emigration. The same may be said of Japan. In India with its scores of dialects, English is becoming a means of communication, between widely diverse races, and the culture of young China is being drawn largely from American sources, with the English language as the medium.

In view, therefore, of its grandiose future, is it not time for something to be done to stabilize its development? At the moment, English is being developed from two distinct sources—the one in the birthplace of the language, the other in the Western Hemisphere, where it

is the unifying factor in a nation composed of a score of nationalities. Now it is inevitable that in course of time the English of Great Britain, and that of America shall diverge. The very individual of each of these two great-nations alone ensures 'this'.

Again, the factors of racial origin, climatic conditions and general environment will have their effect in producing independent lingual idiosyncrasies in America and here, though, as the result of closer contacts, due to improved means of communication these influences will be modified.

Little harm, however, will result from these minor divergences. The culture of the British Isles has not suffered greatly from the fact that the Wigan collier and the Sussex herdsman would find some difficulty in exchanging their views of life.

What would prove disastrous would be any important divergence in the written language, the language of culture. So far the divergences are scarcely worth attention. Read an article in any of the leading American reviews and you will see little difference in the phraseology from that to be found in an equivalent article in one of our own reviews. And in the regions of science, belletrist, and philosophy it needs an expert to decide from the language in which a book is written whether the author dwells by the banks of the Thames or the Hudson.

Yet there is a distinction. Here and there one may note innovations and mutations in the writings of American authors that reveal a development in which we are not taking part. Such things as "aluminum" for "aluminium," the pronunciation of "schedule" as "skedule," etymologically correct—the use of "so" instead of "so that," the rapid supersession of "shall" by "will" in all circumstances, and the greater tendency to incorporate slangish phrases are but a few of the American practices that serve to irritate the purist on this side.

Yet languages are a living growth. They move with the age. English can be no exception. Therefore, as nobody desires that there shall be two more or less distinct languages a few hundred years hence, Britain and America ought to join forces to avert this menace it is contended.

It is suggesting that a body bearing such name as "The English-Speaking Academy" should be created. It might very well consist of a committee of cultured men from British and American universities, with a sprinkling of well-known authors. This committee would hold conferences at intervals and come to an agreement about what should be considered good English and issue authoritative instructions for the guidance of teachers and the authors of grammars.

In this way inevitable changes in the languages could be regulated and there would be established a certain standard, English to which, in matters of culture, the whole English-speaking world would conform.—A. P. Garland in London Daily Express.

Reforestation In B.C. Large Area To Be Planted With Trees and Preserved For Future Generation.

The green timbers area, on the Pacific highway about 20 miles south of Vancouver, which has been practically depleted except for a fringe along the highway, will be replanted and preserved as a forest for the benefit of future British Columbians. This is a part of a new province wide reforestation scheme. It was announced recently under the authority of Hon. F. P. Burden, Minister of Lands. The area comprises 640 acres.

Some 50 acres will be used for nursery purposes from which young trees will be transplanted to other areas over the coast region in an effort to make the forest crop perfect.

Good Wheat Yield From a 17 acre field at Coaldale, Frank Knapp harvested Marquis wheat which yielded 52 bushels to the acre. The field was sown in the last week of April with registered seed of the second generation. The straw grew about five feet high and was remarkably even.

A BEAUTIFUL HOLE

No. 11, Pyramid—395 yards, Par 4.

For the golfer who can carry the liver-shaped bunker in the immediate foreground, this hole is one of the very few which provide a breathing space for those who play the Jasper Park Lodge Course, Jasper National Park, Alberta, over which the Canadian and Western Canada Amateur Championships take place, Aug. 19-24, this summer.

Western Canada tournament is coincident with the Dominion title event. Lots of competitive golf is assured even for those who have high handicaps.

The photograph and the panel show the hole in detail with the yardages to scale below. Tournament play takes place from No. 1 (championship) tee.

Now is the time of the year to advertise for those stray horses and cattle. A small ad in this paper will help you.

BOTH ON NOV. 11th

Armistice and Thanksgiving Day coincide with respect to their both falling on Monday, November 11th, this year and the current issue of the Canada Gazette accordingly publishes a proclamation declaring that day to be one of public Thanksgiving and Armistice on the Monday of the week in which November 11th occurs. This year November 11th falling on Monday gives the proper date to celebrate both occasions the same day.

Here and There

(409)

Representatives of the English Folk Dance Society, thirteen in number, are sailing for Canada on S.S. Montrose, October 24, to take part in the English Music Festival arranged by the Canadian Pacific Railway at the Royal York Hotel, Toronto, November 12-18. The party is under the direction of Douglas Kennedy, leader of the English Folk Dance Society. The practice of English Folk Dances has spread to hundreds of thousands in the British Isles, and it is believed that the dancers' visit here will result in the popularization of these dances in Canada.

Approved plans calling for completion of construction within two years will enable the Canadian Pacific Railway to extend the Cuthbert line through the Battledore and eventually to the fertile farmlands of the vast Moose Lake area, linking that part of Saskatchewan to the plains region lying towards Calgary and thence to a coast outlet at Vancouver. This construction will mean the turning of a new page in the history of one of the most promising agricultural sections of Western Canada.

"The mail must go through," slogan of the air mail service, was well illustrated recently when S.S. Duchess of Bedford docked at Quebec with a heavy mail container which had weathered but prevented taking off at Father Point as is the usual practice. Mails were rushed four miles to the Quebec airport and reached Montreal one hour later. They were delivered by another special plane to the Toronto airport five hours after the Duchess had docked.

Two hundred and forty-eight mink and four foxes, valued in all at \$15,000, were carried recently by Canadian Pacific Express from Ontario and Manitoba and shipped by S.S. Montrose to France. They were all in good shape and represent one of the largest shipments of fur-bearing animals to European breeding farms of recent months. Demand comes from Great Britain, France, Germany, Holland and Switzerland.

For the second time in three years, the Investment Bankers' Association of America held their annual convention at the Chateau Frontenac, Quebec, this October. Over a thousand delegates attended from all parts of the United States and Canada and the convention was addressed by E. W. Healy, chairman and president of the Canadian Pacific Railway.

Beaten out of world series glories, three members of the Yankees Baseball Team, R. Shawkey, coach; Roy Sherid, pitcher; and B. Bengough, catcher, saved their disappointment with a ten-day tour in the Laurentians, hunting section north of Montreal. Hunters coming out of this region just before reported the first and one of them brought a 62-inch moose head out of the wilds as a trophy.

Three years ago there were only four grain elevators in Alberta belonging to the Alberta Wheat Pool. Now there are 437, representing an investment of more than \$6,000,000. "The introduction of combines and auto trucks has speeded up harvest, on the Canadian prairies to a remarkable degree," says an official bulletin.

Undertaken as a nation-wide movement for the promotion of British and Canadian music and to give Canadians an opportunity of hearing the music which is their legitimate heritage, the unique British and Canadian concert series sponsored by the music department of the Canadian Pacific Railway will, it is announced, be under the distinguished patronage of His Excellency, Viscount Willingdon, Governor-General of Canada. Six Canadian centres—Victoria, Vancouver, Calgary, Regina, Winnipeg and Toronto—have been selected for the first season's recitals and 14 artists in all will provide the programmes which are to continue at intervals during the fall and winter.

Definite steps to control the traffic in deer and moose hides which has reached large proportions, have been taken by Chief Game Warden H. H. Ritchie, of the New Brunswick Department of Lands and Mines. Last year 7,000 deer hides and about 700 moose hides were exported from New Brunswick largely to glove manufacturers in Quebec and Ontario and the states of Maine and New Hampshire. Tin seal tags must now be affixed to dead animals before transportation becomes legal.

Reports are appearing in the British press that the Prince of Wales stands to make a fortune out of oil production in his High River ranch. Some reports have estimated the possible profit as high as \$5,000,000. This is regarded in the west as sheer guess work, although the Turner Valley which practically adjoins the Prince's ranch has developed oil on a large scale. Meanwhile there are no wells being drilled on the ranch though drilling is in progress about a mile away.

The peltries are usually associated with wheat and cattle, but they are also important sources of commercial fish. The third largest lake on the continent is in Manitoba and great bodies of fresh water in Manitoba, Saskatchewan and Alberta teem with fish of high quality. In one year, nearly 10 carloads of whitefish and pickerel were shipped from these provinces to Minneapolis, Chicago and New York.

VIKING

Following the trend of modern merchandising methods, J. L. Clinton has fitted up his store in conformity with the latest in this respect. He has had the interior refitted and repainted on the grocerteria plan, making it easy for customers to pick out their wants, with the price of each article plainly shown. The blue and white scheme has been followed out.

Mr. Clinton has been in business here for the past five years catering to the needs of the public with staple and fancy groceries, fruits and vegetables. He has sold his ice cream business to the Viking Cafe.

It is a mark of progress to see our local merchants improve their places of business from time to time, and in this way to help not only themselves but establish more pleasant premises for their customers in which to do their shopping. Clinton's advertisement of all the rest of our live merchants are found in The News each week.

Last Thursday evening Evan Jones, seven miles east of town had the misfortune to lose his garage by fire about eight o'clock. He was in the act of draining some gasoline from the tank of his car which was in the garage, for his brother Percy, of Irma, Percy lit a match several feet away to give his brother some light on the subject, but the match must have sputtered and ignited the gasoline. The car and garage were soon in a mass of flames, and before Evan could get out from under the car his clothing caught fire and he was burned quite severely before his burning clothing was extinguished. The car was pushed out of the garage and only slightly damaged. When it was seen that the garage could not be saved, efforts were made to save the house and barn.

Fire destroyed the residence on the late M. M. McLeod farm, two miles southeast of town early Sunday morning together with all contents. How the fire originated is a mystery, as we understand, there was no one in the house at the time.

A very enjoyable social affair took place in the fine country residence of Mrs. W. J. Harris, south of town, on Friday evening, October 18th when a surprise party was given in honor of Mr. and Mrs. K. McPherson by friends and members of the local U.F.A. of which organization Mr. McPherson has been secretary for a number of years.

Mr. and Mrs. McPherson were first invited to a chicken supper, after which eighteen carloads of friends arrived and completely surprised them. Henry Peterson on behalf of the local U.F.A. presented Mr. McPherson with a \$10. gold piece in appreciation for his services as secretary of that organization. Mrs. McPherson and Miss Canavin also were each presented with a Wedgewood cup and saucer. Mr. McPherson suitably responded and thanked the members of the Iron Creek U.F.A. for their gift. After the presentation the evening was spent in singing and card playing and closed with a delicious lunch provided by the ladies of the U.F.A. After joining in and singing "Auld Lang-Syne" and "God Save the King" all left for their homes proclaiming the evening a great success.

Mrs. A. E. Hanson, wife of Rev. Hanson, who was Lutheran pastor at Arma, north of Camrose, from 1902 to 1910, passed away on Friday, Oct. 4th, at La Cross hospital, Peterson, Minn. The late Mrs. Hanson was an old timer in the Arma district. She was about sixty-five years of age. Rev. Hanson survives her.—Camrose Canadian.

Rev. Hanson was pastor of the Viking Lutheran church from 1910 to 1914. This community expresses regret to hear of Mrs. Hanson's death, and extends sympathy to the bereaved relatives.

The Swan brothers from Barnes, southern Alberta, were in this district a couple of days last week visiting at the home of Mr. P. M. Bradley and other friends. Before leaving they said they were greatly impressed with the town of Viking and the possibilities of this district.

Among the fortunate few hunters who have been able to get a shot at geese this fall is J. J. Skaltzky who bagged three northwest of town Friday morning. They were fine birds and local nimrods are extending congratulations to Jack on his success.

Miscellaneous showers have been held this week at the home of Mrs. F. Miller, and Mrs. P. A. Main for Miss Vera Loades, a bride-to-be of this month.

Meet your friends at the Halloween frolic and masquerade in the new Elks Community hall, on Wednesday evening, October 30th. Prizes given for home made costumes. See posters for further particulars.

The parents and teachers meeting scheduled for Tuesday evening was postponed on account of the unavoidable absence of the chairman of the school board C. G. Purvis.

CHEVROLET SIXES Sold this year as any other six at any price in any year!

NO other six-cylinder car has ever earned, in any year, one-third the public acceptance... one-third the volume of sales... which have been bestowed upon Chevrolet Six during the nine months since its introduction.

This tremendous public acceptance is due to three outstanding facts. To the fact that Chevrolet offered, for the first time in history, a six at the price of a four... To the superb standard of quality in Chevrolet's design, material and workmanship. And to the new, greater performance abilities that Chevrolet Six provided. Chevrolet Six was four years old in experiment, in research, in testing, in proving... before the first Chevrolet Six was placed in the hands of its owner. And that owner... like the million and a quarter owners who followed his example... SOLD HIMSELF on the Chevrolet he bought... on the road, behind the wheel. Why not let us place a Chevrolet Six at your disposal... and form your own opinion of its value.

East Will Again Meet West

1. The Trans-Canada special train takes the tourists across the Dominion by one route and back by another. 2. The scenery at Banff, enjoyed by the travellers, is among the most beautiful on the continent. 3. The trees in Stanley Park, Vancouver, were growing before Columbus discovered America. 4. One of the C.P.R.'s most powerful locomotives, used for transcontinental traffic. 5. "Woolly Westeners" leading a wild life.

So successful and popular have the trans-continental expeditions of past years proven and so excellent have the results been proclaimed, that this summer the Fifth Annual "Across Canada and Back" tour, promoted by Dean Sinclair Laird of Macdonald College, Ste. Anne de Bellevue, P.Q., over the lines of the Canadian Pacific Railway, will be undertaken this year. It has been announced by the C.P.R. offices in Montreal.

This tour leaves Toronto on July 23 by special train, travelling west via Sudbury, Port Arthur, Winnipeg, Indian Head, Moose Jaw, Calgary, Banff, Windermere, Nelson, Penticton, Vancouver, and Victoria; and returning east by Emerald Lake, Yoho Valley, Lake Louise, Edmonton, Saskatoon, Winnipeg, and down the Great Lakes by steamer from Port William past Sault Ste. Marie to Port McNichol, and thence by rail to Toronto.

Of Educational Value.

Although the traveller is interested chiefly in the attractions of the tour such as scenery, "sights" and novel experiences en route, the educational phase is one highly considered by its promoters. The bulk of the minor difficulties and differences that

arise within the Dominion are the result of lack of mutual understanding by the various component parts of the country in the problems of the others. Mutual understanding and appreciation can only be achieved by interest and knowledge, and these are best acquired by travel and personal visits to the other parts of Canada, and intercourse with one's neighbours.

Passengers on board the C.P.R. special "Across Canada and Back" train will not only enjoy the glories of western scenery, the invigorating breezes of the Pacific, and the delightful voyage down the Great Lakes; but they will also become acquainted with the life of their Western compatriots. As they pass through the country they will see the industrial and agricultural activities in progress and enjoy Western hospitality as well as scenery.

Under the leadership of one of the most prominent and popular educationalists in Eastern Canada, Dean Sinclair Laird of Macdonald College, and composed chiefly of travellers from Eastern Canada, the visit will accomplish much in the way of furthering common knowledge and making the Easterner better acquainted

with the Westerner, and vice versa.

Motoring Included.

The twenty-one day tour will give the tourists participating a comprehensive and attractive view of the west. Arrangements have been made to break the journey in many interesting ways. Motor drives will be taken between Banff and Windermere over the famous 101 mile highway; along the new "Great Divide Highway" from Field, B.C., via Emerald Lake and the Yoho Valley, and Wapta-Banff-Camp and through the quiet Dishkhor country and the fertile Okanagan valley.

Steamships will not only be taken down the Great Lakes, but also on Kootenay Lake, and across the Straits of Georgia between Vancouver and Victoria on the Pacific coast. The equipment of the special train will include dining cars, sleeping cars, drawing room and compartment cars, a special baggage car fitted with dressing rooms and wardrobe accommodation, and observation cars, which will be an open-top type during the journeys through the mountains. The train will even have special news bulletins and receive copies of local newspapers along the route.

Caught Disease On the HANDS!

Skin disease threatens us every day. Invisible germs of blood poison, eczema, etc., are waiting to infect the least cut or sore place. The money you use carries germs—you get them on the handles, rails and straps of the train and street cars, and in a score of other ways. So, through Zambuk, Mr. Henry C. Davis, of South 17th Street, Kansas City, U.S.A., has just escaped a virulent type of eczema, contracted on the handles of the train and street cars, through use of public towels.

"I had medical advice," he says, "tried in addition all sorts of so-called eczema remedies, without finding the hoped-for relief. Zambuk treatment soon gave positive results. It took away the painful irritation and quickly purified and healed the deep troublesome sores."

WORLD HAPPENINGS BRIEFLY TOLD

The National Research Council has been asked to appoint an associate committee on weed control research. The Earl of Harewood, father-in-law of Princess Mary, died at his ancestral estate, October 6. He was 83 years old.

Admiral Sir Richard Philimore, first and principal naval aide de camp to His Majesty, has been placed on the retired list. Vice-Admiral Sir H. W. Richmond is promoted admiral.

Lady Schultz, wife of the late Sir John Christian Schultz, former Lieutenant-Governor of Manitoba, and Senator, died October 7, at Winnipeg.

R. B. Morley, general manager of the Industrial-Accident Prevention Association, Toronto, was elected Canadian representative on the executive committee of the National Safety Council at Chicago.

Canada and the other British Dominions will be represented at the proposed five-power naval disarmament conference in London, England, next January, according to present plans.

A crowd of several thousand persons, at Ottawa, saw Ber. Dietrich, 22-year-old parachute jumper, plunge 2,800 feet and fall within 100 feet of them when his parachute failed to open.

Sir Jagdish Bose, world famous Indian scientist believes he has discovered a drug extracted from a plant found in the Himalayan Mountains, which would render permanently victims of heart failure.

Stepping out of a plane after a short flight at Red Wing, Minn., Mrs. Ray Ahrens, 30, of St. Paul, walked into the whirling propeller of another ship and was killed. The pilot of the plane, Max Conrad, 27, was seriously injured trying to save Mrs. Ahrens.

Test Was Successful

Value Of Instruments To Overcome Perils Of Flying Through Fog Is Proved

Completion of the first airplane flight with a cockpit entirely shut off from light was announced by Harry P. Guggenheim, president of the Daniel F. Guggenheim Foundation for the promotion of Aeronautics, as the final successful test of a group of instruments designed to overcome the perils of flying through fog.

Leut. James H. Doolittle, seated in the darkened cockpit, took off from Mitchell Field and flew along the path of a directing radio beacon to a safe landing.

Her Father—You have been a very naughty girl and I'm going to spank you.
Little Elsie—Would you strike a lady?

W. N. U. 1807

X-Ray In New Role

Is Aid To Manufacturing and Notably In Aviation

The X-ray, an instrument of physicians and surgeons, has become a tool of the foundry room, and its benefits to the metal industry have been of considerable aid to manufacturing, notably in aviation, according to the statements of W. L. Fink, metallurgist, before the National Metals Congress at Cleveland.

The shadowgraphs of the X-ray show shrinkage, blow holes, pin hole porosity and other imperfections in castings which never would be discovered by other means of examination, he asserted. As a consequence, the metal frames of airplanes can be thoroughly tested before construction of the plane is completed, a safety device that would be available in no other way.

By the same means castings generally have been improved, Fink declared.

Men Can Be Placed

Demand For English Youths Trained For Canadian Farm Work

Immigration officials, at Ottawa, are confident plans will be found for all the 3,000 young men to be trained in England this winter for work on Canadian farms. Placements will be made next spring by the Dominion and provincial authorities in accordance with demand in various parts of the country. Already this year, it was explained, 2,500 trained men from overseas have taken up work on farms here. Last year the number was about 1,400.

DARLING COAT DRESS

A jaunty little model for girls of 8, 10, 12 and 14 years is illustrated in feather-weight tweed in beige and brown. A brown suede belt denotes fashionable raised waistline. The collar is of plain beige woolen which is repeated in turn-back cuffs.

It is the coolest blue breasted, trimmed with huge beige and brown bone buttons.

The entire effect is smartest ever. It is made at a small outlay, and practically only side and shoulder seams to join. The fronts are unbuttoned and rolled into revers with the attached straight collar.

Style No. 713 will instantly appeal to the girl with sophisticated taste.

It is most attractive too in navy blue wool crepe with vivid red suede belt and matching bone buttons, with collar and cuffs of white crepe de chine or of white pique.

Kashmir printed wool jersey in Copenhagen blue colouring trimmed with harmonizing plain blue jersey is very smart.

Plain wool jersey, homespun, tweed printed silk, crepe de chine, velvet, cotton pique, linen and printed cotton broad cloth selections.

Pattern price 25 cents, in stamps or coin (coin is preferred). Wrap coin carefully.

You Must Have Sugar

Sugar is one of the much needed elements in a balanced diet.

WRIGLEY'S supplies sugar in a convenient way. The flavor is an extra delight.

Then too—you know you aren't adding weight. Sugar is a fuel that burns up needless fat.

Canada's Road Mileage

Highway Construction and Good Roads Program Receiving Much Attention

Partly to accommodate the rapidly increasing tide of tourist traffic, much of which travels by automobile, the construction of highways and good roads throughout Canada continues to advance. In the past three years the mileage of surfaced roads in the Dominion has been increased from 47,411 miles to 64,121 miles. Including improved and unimproved earth roads, the total mileage of highways open for traffic in all parts of Canada was at the end of last year, 281,977, or a mileage that would girdle the earth over 15 times.

Last year 8,610 miles of highways were constructed of which 2,454 miles were earth, and 6,156 surfaced. The total expenditure on construction was \$38,912,029, while a further sum of \$18,963,381 was spent on maintenance. The year's work included 541 miles of permanent surfaced highways in bituminous macadam, bituminous concrete and cement concrete construction. Water-bound macadam totalled 417 miles and gravelled highways 5,198 miles.

There were 1,076,819 motor vehicles registered in Canada in 1927, which was an increase of 131,147 over the previous year. Passenger automobiles registered amounted to 921,395, an increase of 100,028 over 1927. On a per capita basis, there was one passenger automobile per 16.5 persons in Canada, and one motor vehicle including trucks, motor cycles, buses, etc., per 9.0 persons.

Only three countries had greater densities than Canada, the United States, with 5.1, Hawaiian Islands, 7.9, and New Zealand, 8.0 persons per motor vehicle.

The treatment, which includes either artificial malaria inoculation or exposure to malarially infected mosquitoes, has been found, says Dr. Meagher, to increase the length of life, to render existence more natural, and to produce improvement in the physical condition and the mental state.

"The response in individual cases," he states, "varies from a negative result to apparent complete recovery."

Preparing For Next Dominion Census

Questions Being Considered and Plans Are Under Way

The questions which will be asked the people of Canada at the next general census are now under consideration by the Dominion Bureau of Statistics. The present plan is to take the census beginning on June 1, 1931, and all the questionnaires to be used must be adopted by the governor-in-council. In view of the immense amount of printing and organization required, the initial plans are well under way.

The question of whether people should be classed Canadians or according to the nations from which their ancestors came, will not likely prove so troublesome in the case of the census as it frequently has with other Dominion and provincial government surveys. The name of every man, woman, boy and girl in Canada will be taken down. They will likely be listed as Canadians, British subjects, those who are not Canadian, and allies. Canadians will include all those born in Canada, all other British subjects who have lived in Canada long enough to acquire a domicile here, all persons naturalized and their children.

In addition to the census of the humans, the census of the horses and the cows and the sheep and the hen will be taken in an agricultural questionnaire.

New Cure For Paralysis

English Doctor Says Induced Malaria Has Been Tried Out Successfully

Induced malaria as a successful treatment of paralysis, is revealed in a recent report of Surgeon Rear Admiral E. T. Meagher, covering experiments on a number of cases in English and Welsh hospitals.

"The treatment of general paralysis," his report states, "by induced malaria, offers more promise of success than any other form of treatment, that has been given extended trial."

The treatment, which includes either artificial malaria inoculation or exposure to malarially infected mosquitoes, has been found, says Dr. Meagher, to increase the length of life, to render existence more natural, and to produce improvement in the physical condition and the mental state.

"The response in individual cases," he states, "varies from a negative result to apparent complete recovery."

Cuts Running Time

Canadian National Cuts Two Hours Off Montreal To Winnipeg Trip

Reduction of two hours in the running time of the "Continental Limited" all steel train of the Canadian National railways, between Montreal and Winnipeg, became effective on September 29th. Under the new schedule "The Continental Limited" leaves Montreal at 11:15 p.m. daily instead of 10:15 p.m., as formerly, and arrives in Winnipeg at 7:15 on the second evening instead of 8:15 p.m., as formerly.

"The Confederation" the all steel train operating between Toronto and Vancouver, B.C., is being continued in service until mid-November, after that date it will operate between Toronto and Edmonton, thus giving faster winter service from Toronto to Edmonton, and also to the cities of Regina and Saskatoon and intermediate points.

Recipes For This Week

(By Betty Barclay)

ORANGE SWEET PICKLE

4 oranges.
2 cups sugar.
1½ cups vinegar.

1 teaspoon whole cloves.

1 teaspoon stick cinnamon.

Peel oranges, removing all white membrane; cut into thick slices; steam until clear and tender. Boil sugar, vinegar and spices for 25 minutes. Add fruit and simmer slowly for one hour. Place in sterilized jars and seal.

QUINCE AND APPLE MARMALADE

Wash quinces and remove blossom end. Cut fruit in small pieces, add sufficient water to cover, and cook until soft. Rub through sieve and combine the pulp with an equal amount of tart apple pulp. Use two parts sugar to three parts pulp. Cook almost half an hour, until it is thick and clear, then turn into clean, hot glasses. Cover with hot paraffin when marmalade is cold.

Never judge a man by his actions when he is away from home.

People who prize the finer things of life usually demand Red Rose Orange Pekoe Tea. A money-back guarantee with every package.

RED ROSE TEA "is good tea"

RED ROSE ORANGE PEKOE is extra good
In the best package—Clean, bright aluminum

Railway Not Open

To Regular Traffic

Much Work To Be Done On Hudson Bay Road

Making the run from Churchill to The Pas in 20 hours, the special train bearing the Hon. Chas. A. Dunning, minister of railways, and party made likely the fastest trip yet made over the new road, but Mr. Dunning said that the running time was one thing he did not wish to discuss.

"If the public is given the impression that fast time can be made on the Hudson Bay Railway at present, people will wonder why it is not open to regular traffic," said he.

"There are still some places where the road is not smooth and where it is not ready for passenger traffic."

"My speech in parliament regarding the opening of the road has been criticized. It has been said that any one who wanted to go in should be permitted, but the first thought with the H.B.R. is to make it safe and efficient. Any one who has been in the north will realize that it would not do to start a passenger traffic as yet. I would say it will be next summer before regular service starts."

One point Mr. Dunning did stress was his opinion that if critics of the government policy with regard to Churchill could visit the place and see how ill suited it is at present to receive an influx of people, they would not want to go there. He pointed out that experienced men in the north were lost and often suffering in the places that others wanted to visit at the worst time of the year.

An Unusual Experiment

Rejuvenation Expert Plans To Produce Race Of Super-Sheep

Dr. Serge Voronoff, the famous rejuvenation expert, is to perform on a large scale gland grafting operations with a view to producing a race of super-sheep to increase production of wool and meat. After the operation sheep will be handed back to the French Government and private owners, and they will be examined by a committee of experts, who will compare their growth and development with an equal number of sheep which have not been rejuvenated. In 1932, France's Central Wool Committee will summon an International Sheep Conference in Paris, when the world's experts will be invited to compare the two flocks.

Woman Salvages Ships

Mrs. Cox, of Glasgow, Scotland, is believed to be the only woman salvager in the world. She helped raise the German fleet sunk at Scapa Flow, in 1919. In the five years she has aided in raising 26 destroyers and two battle cruisers.

Pleased With Canadian Hospitality

British Delegation To Institute Of Pacific Relations Show Appreciation

In a telegram from Victoria, B.C., where they took the boat for Japan, the British delegation to the Institute of Pacific Relations, wired Premier Mackenzie King, an appreciation of Canadian hospitality. The delegation crossed Canada en route to Kyoto.

The message, signed by Lord Hailsham, Lord Chancellor of England and head of the delegation to the Institute of Pacific Relations, said: "I desire to express to you, and through you to the people of Canada, our most cordial thanks for the magnificent hospitality extended to us in our journey across the Dominion."

Premier King replied: "I thank you warmly for your kind message. I extend best of wishes to each member of the British and Canadian delegations."

An Easily Made Dessert

Caramel Pudding, one of the most delicious desserts one can serve, and one especially loved by children, can be said practically to make itself. Here it is:

Place an unopened can of Borden's Eagle Brand Condensed Milk in a kettle of boiling water and simmer for two and a half hours, being careful not to let the kettle boil dry. Remove can, cool and chill. Remove top of can, cutting along the side of can—not the top—so that the contents may be removed whole; place on a serving dish and garnish with hot nut meats and whipped cream—or use plain unsweetened cream, with or without garnish.

Praise For British Diplomacy

Proposals To Egypt Marvel Of Tact, Says American Paper

The Chicago Tribune says: "The British proposals to Egypt reveal British diplomacy and imperial statesmanship at their best, and that is the best in the world. Americans must read them with admiration mingled with envy, for when will the United States in its important and often delicate relations have the benefit of so much tact, skill, and sane judgment as Mr. Henderson's proposals display?"

Doctor (to patient's landlady): "Just keep him in bed, and above all see that he does not eat too much."

Seaside Landlord (grimly): "Certainly I will; I have two or three other boarders who really ought to be in bed, too."

Teacher: "What is the little boy called who has never known a mother's care?"

Small Boy: "An incubator kid, ma'am."

The Most Beautiful BLACK you have ever seen

"THE most beautiful black you've ever seen!" "All my friends admire my new black silk!" "The coat I thought was hopelessly spotted is now a new, beautiful black!" These are typical comments from women who have used these true, jet black dyes.

Diamond Dyes Black never gives cloth a greenish or bronzy look, as so many black dyes do. Like Diamond Dyes Red and all the other Diamond colors, it is easy to use and gives such lasting results because it is rich in pure anilines. It's the anilines in dyes that give them brilliance, depth and fastness; make them go on smoothly and evenly, without streaking or spotting. And Diamond Dyes contain the highest quality anilines that money can buy. The entire package of Diamond Dyes is the highest quality dye, prepared for general use. It will dye or tint silk, wool, cotton, linen, rayon, or any mixture of materials. The blue package is a special dye, for silk and wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this!—Don't buy cheap dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

Diamond Dyes contain the highest quality anilines money can buy. And it is the anilines that count. They are the life of dyes; the source of their rich colors; brilliance and permanence.

The Singing Fool

By HUBERT DAIL
Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, wins fame as a composer of popular songs. He marries Molly Winton, a ballad singer, and makes her famous, too. Molly and Al have a baby, Junior, whom Al adores. Molly becomes interested in John Perry, Al's close friend, and one night she tells Al she has ceased to love him. Al refuses to believe it, but when Molly fails to show up for a New Year's Eve celebration at the Club Bombo, where Al is part owner, he rushes home to find she has packed up and left, taking Junior. She leaves a note suggesting that she loves John Perry and that Al need not try to persuade her to come back.

CHAPTER XVII.

"This is Mr. Stone. Is the car in?"

"No, Mr. Stone," came the answer. "Mrs. Stone took it out."

"When?"

"Tonight, about an hour ago. She said she might not be back for several days."

"Was my baby with her?"

"Yes, sir, and a gentleman."

"I see. Thank you."

Al had struggled hard to keep his voice calm. He didn't want to ask too many questions; that would excite the suspicion of the garage people and Molly's flight might get into the newspapers.

He walked to the nursery window; down below he could see the crowd in black masses still moving slowly up and down the sidewalks, welcoming the glad new year. He shook his head—no, there wasn't a chance of finding Molly tonight. He couldn't call the police because there was no definite charge he could make against her. Besides, it wouldn't be the thing to do; it would mean publicity and ghastly scandal that would involve his baby. Al thought his rage had passed now and that he was thinking clearly. He went to the doorway and heard the maid putting about in her little back room.

"Celeste?"

"Yes, sir."

"If you haven't gone to bed will you step here a moment?"

"What time did Mrs. Stone leave?"

"About an hour ago, sir."

"Thank you. Goodnight."

"Yes, sir."

"What time did Mrs. Stone leave?"

"About an hour ago, sir."

"Thank you. Goodnight."

"Yes, sir."

"What time did Mrs. Stone leave?"

"About an hour ago, sir."

"Yes, sir."

"What time did Mrs. Stone leave?"

"About an hour ago, sir."

"Thank you. Goodnight."

thinned out, for it was well on toward morning. Occasionally he met a band of drunken revellers, but he stalked by them with unseeing eyes, going nowhere in particular, but feeling the necessity for walking, walking.

All the time his mind worked furiously. Had Molly given up her stage job, had she the Merry-Go-Rounders, had she quit the show flat? He must see Marcus in the morning and find out. Marcus might have some idea of her whereabouts.

Now Al saw the dark expanse of Central Park before him and, without thinking, he turned in the first entrance he reached. There were the low, snow-covered hills, the bare trees whispering gently in the winter wind, the reflections of the skyscraper lights in the cold water. Here was the Japanese bridge where he had taken Junior walking only last Sunday. He stopped as if waiting for someone or something.

At that moment a dark limousine came speeding past him on the driveway. Was it Molly's car? He sprang forward.

Quickly as Al moved, the limousine was faster. It looked like a Rolls, but he couldn't be sure. And it was too dark for him to read the license plate. He stopped; there were ten thousand cars in New York that resembled Molly's. He went on, walking the streets until daylight. Then he headed for home, threw himself on his bed, fully clothed, and fell into a sleep that was tortured by nightmares.

He awoke with the sun streaming through his windows, tossed off his clothes, bathed, shaved and dressed hastily for the street. The first man he saw was Marcus.

Marcus was in his office. He looked up in genuine surprise when Al walked in, pale and haggard.

"What's the matter, Al?"

"Nothing much. Has Molly quit your show?"

"Yes, didn't you know? A shadow crossed Marcus' face. "She quit last night, just like that."

Marcus snapped his fingers. "With no explanation except that she was tired and needed a rest. The press department got busy on it. Didn't you see the morning paper?"

(To Be Continued.)

A Speedy Traveller

Rabbit Can Keep Ahead Of Ford Motor Car

The driver of a motor-car in Switzerland, tells the story of the astonishing speed and long-continued effort which a rabbit is capable of. He happened to start one, which on its flight kept to the road. In order to keep up with the rabbit, the man had to speed up to about 34 miles an hour, and the sturdy little creature held out for over a league before it finally jumped into ditch by the roadside.

No one need endure the agony of corns with Holloway's Corn Remover at hand to remove them.

Pullman Porter (to lady from the country): I'll give you a paper bag for your hat, lady.

Country Lady: You whippersnapper! You won't get this hat for a paper bag.

It is only after a man is "collared" that he notices the "ties."

MOST people rely on Aspirin to make short work of their headaches, but did you know it's just as effective in the worse pains from neuralgia or neuritis? Rheumatic pains, too. Don't suffer when Aspirin can bring such complete comfort without delay, and without harm; it does not affect the heart. In every package of Aspirin you will find, proven directions with which everyone should be familiar, for they can spare much needless suffering.

"Safety First" Invention

New Appliance For Use At Level Crossings

An electrical appliance has recently been invented, and accepted by the British Ministry of Communications, which warns the public of the approach of trains at level crossings. The train itself works the machine by passing over a small lever attached to an electric wire, which automatically lights a big warning disc placed on a pole or the corner of a house near the crossing, and also sounds a powerful horn. Another sign shows whether the appliance is working properly or not. The inventor is an Australian friar.

DO NOT NEGLECT YOUR LITTLE ONES

At no time of life is delay or neglect more serious than at childhood. The little of little ones come quickly and unless the mother is prompt in administering treatment a precious little life may be snuffed out almost before the mother realizes the baby is ill. The prudent mother always keeps something in the medicine chest as a safeguard against the sudden illness of her little ones. Thousands of mothers have found, through experience, that there is no other medicine in equal to Baby's Own Tablets and that is why they always keep a box of the Tablets on hand—why they always feel safe with the Tablets.

Baby's Own Tablets are a mild but thorough laxative which by regulating the bowels and stomach banish constipation and indigestion; break up colds and simple fevers and promote healthy, natural sleep. Concerning them, Mrs. Isaac Sonia, St. Eugene, Ont., writes: "I have been using Baby's Own Tablets ever since baby was a month old and have found that they reach the spot and do more good than any other medicine I have ever tried. I always keep the Tablets in the house and would advise all other mothers to do so." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Blockville, Ont.

Little Helps For This Week

Make sure thy friend. Proverbs vi, 3.

Believe me better than my best. And stronger than my strength can hold.

Let thy royal faith transmute my pebbles into gold.

—Elizabeth Stuart Phelps.

To win and hold a friend, we are compelled to keep ourselves at his ideal point, and in turn our love makes us his the same appeal. All around the circle of our best beloved, it is this idealizing that gives to love its beauty, and its pain, and its mighty leverage on character—its beauty, because that idealizing is the secret of love's glow; its pain, because that idealizing makes the constant peril of its vanishing; its leverage to uplift character, because this same idealizing is a constant challenge between every two, compelling each to be his best. "What is the secret of your life?" asked Mrs. Browning of Charles Kingsley; "Tell me, that I may make mine beautiful too." He replied, "I have a friend."

—William Channing Gannett.

Women and Asthma. Women are numbered among the sufferers from asthma by the countless thousands. In every climate they will be found, helpless in the grip of this relentless disease unless they have availed themselves of the proper remedy. Dr. D. Kellogg's Asthma Remedy has brought new hope and life to many such. Testimonials, sent entirely without solicitation, show the enormous benefit it has wrought among women everywhere.

Little John was interested in the referee on the sleeping porch. "What are those round things Daddy?" he asked.

"They are knot holes, Son."

"Well, if they are not holes, what are they, Daddy?"

A reliable Antiseptic—Minard's Liniment.

Radio Sets Installed

Prisoners At Sing Sing Prison Can Listen In

In each of the 1,800 cells of the new extension at Sing Sing Prison is a radio receiving set, after the manner of the ultra-modern, metropolitan hotels. The installations have even made, it was officially confirmed today, following reports by prison employees, and in the future convicts with terms of from two years to life may listen to concerts, to news of the outside world, sermons and bedtime stories.

The guests of the state of New York may listen in, but they may not tune in. They must listen to what comes over the air from the central receiving station in the prison auditorium, whether the program be to their taste or not. The privilege was extended after the new rules, curtailing motion picture theatre visits from seven nights a week to two, went into effect.

The Mutual Welfare League bears the expense of installing and maintaining the radio equipment.

Making Trans-Atlantic Flight

Passengers On Lines Saw Swan In Mid Ocean

Passengers aboard an ocean liner at Southampton, reported observing a trans-Atlantic "flight" which had not been heralded in news dispatches. In mid-ocean they met a great white swan, with neck outstretched and wings flapping. The swan was apparently making for the nearest land and did not take refuge aboard the ship, which was more than 900 miles from the coast of Ireland when the bird was sighted.

Minard's Liniment For Neuritis.

An Overworked Dog. A Chamute ice-cream manufacturer advertised that he would give a cone free to every boy who called at the plant and brought along his dog. One dog was reported near collapse after assisting all the boys in one neighborhood to obtain their cones.

EVEREADY LAYERBILT

Flat layers mean increased life and cheaper power, with less chance for trouble—that is why most battery-powered sets are "going Layerbilt" these days. Patented Eveready Layerbilt construction makes it possible to pack more current-making material in a given space. Buy Eveready Layerbilt "B" batteries for longer and better service. You'll save money.

From Mother of Six

"I think Lydia E. Pinkham's Vegetable Compound is wonderful! I have had six children of which four are living and my youngest is a bonnie baby boy now eight months old who weighs 23 pounds. I have taken your medicine before each of them was born and have certainly received great benefit from it. I urge my friends to take it as I am sure they will receive the same help I did."

—Mrs. Milton McMullen, Vancouver, Ontario.

Main Street

Mr. and Mrs. George Tripp motored to Edmonton Tuesday.

Irma Ladies Aid met at the home of Mrs. Roy Askin, Thursday afternoon.

Mr. G. Quast, of Macklin spent the week end with his mother Mrs. Barreth at Irma.

Mr. A. E. Hassey has been enjoying a month's visit from a brother who returned to his home at Vancouver Saturday night.

Mrs. F. W. Higginson, Mrs. Smart and Andrew Smart, returned Monday after a ten days motor trip and visit with friends at Calgary.

Mr. Chas McBane of the Albert district intends leaving his family for Westlock, Alberta, where they intend making their future home.

Mr. and Mrs. G. S. Quast and Evelyn, of Macklin, Sask., spent the week end with their mother Mrs. Berreth and sister Mrs. N. M. Mathison.

Tuesday afternoon Mr. Jas. Hedley received a wire that his mother was seriously ill at London, Ontario, and by six thirty Mr. Hedley was on the fast train to be with her.

Tuesday while Constable James was enquiring for the location of some parties in the Orbindale district he happened to spy four nice plump prairie chickens which had just been shot. As the chicken season closed on the 15th the constable laid a charge of shooting out of season resulting in a conviction and fine amounting to over \$15.00.

Mr. and Mrs. C. W. Milburn and daughter arrived from Toronto Saturday to visit with Mr. Milburn's brother Mr. J. W. Milburn. Walter as he is known by all of the old timers was one of the first men to build in Irma when he and his brother built the first general store and hall which was later destroyed by fire.

The raffling of the Quilt and Bedspread for the W. I. took place on Saturday, October 19th in Kiefer's hall. Just before the dance Mr. S. Coulthman was asked by the committee to shake up the tickets after which he called Clarence Carter to draw the first ticket which was for the quilt, No. 147 being the lucky number, and Mr. Bruce Hadlow being the lucky boy. Bruce will likely start packing his hope chest now. Ina Mathison was the next one called to draw for the bedspread, 101 was the lucky number, and Mrs. T. H. Berreth of Hardisty being the lucky one to get the bedspread.

The next meeting of the Women's Institute will be held at the home of Mrs. Percy Jones on November 7th and will start at 3 o'clock sharp.

The New Triumph Marconi Batteryless Console

The performance of this new Marconi model sets a new high standard in the field of Batteryless Radio.

Powered with nine of the latest "AC" Radiotrons, it operates direct from the house lighting current, furnishing the sensitive selectivity and tone brilliancy that will satisfy the most critical.

Built into its handsome two-tone matched walnut cabinet is a Superb Dynamic Speaker, assuring a smoothness and a fidelity of reproduction over the entire musical scale. Rattle or distortion is pleasingly absent from reception even when operated at roomfilling volume.

Judged by any standard this new Triumph Marconi Batteryless is a Receiver the owner may well be proud of.

Complete with tubes \$268.00
Batteryless Table Model, Complete \$175.00

INCREASING THE VALUE OF CANADA'S MUSKRAT RESOURCES

The increased demand for muskrat pelts, the consequent rise in price and the marked decrease in the natural supply are the main reasons for the increasing interest and widespread demand for information as to economic possibilities of raising the fur-bearer.

To meet this demand and to increase the value of Canada's muskrat resources, the Department of the Interior, Ottawa, through its Natural Resources Intelligence Service, has prepared and issued a publication entitled "The Muskrat, a Canadian Fur Resource". The purpose of the information contained in this booklet is to make possible a wider knowledge of the essentials necessary for raising muskrat under control either in their natural habitat or in pens.

Canada, owing to climatic and other favourable conditions is particularly adapted for the production of high quality muskrat and possesses as well thousands of acres of marsh and other more or less unproductive areas on which they may be propagated. The development of these areas for the propagation of muskrat would not doubt provide a whole or part time occupation for many persons, and naturally increase the production and value of Canada's muskrat resources.

This booklet on the muskrat will be sent free on request to the Natural Resources Intelligence Service, Department of the Interior, Ottawa.

THE JOYS OF INDIAN SUMMER

It is a wonderful season of the year, with a charm and an appeal all its own, and one instinctively wishes that these Indian Summer days might last forever. Soft, mellow autumn is nature's armistice between the blustery equinoxes and the stern hostilities of winter and it is the more delightful because it is so brief. One by one, the golden days come and go; little by little each day grows shorter than its predecessor; day by day, the leaves have turned from vivid green to variegated and gorgeous hues, fade and fall gradually, almost imperceptibly the days and weeks of autumn wear away toward the rigors of winter. Every season of the year has its own peculiar beauty and charm; but, in many ways, fall is the most beautiful and delightful of all seasons. It is the season when nature's appeal is most strongly felt and her artistry is most conspicuously evident and there is withal a suggestion of melancholy about it that perhaps contributes to its fascination. Indian Summer belongs distinctively to the prairie country—to the plains where the red man once pursued the buffalo—and happy are the people whose lot is cast where they may enjoy its succession of mellow days and moonlit nights. It is of all seasons of the year one of the most beautiful and appealing.

Here is a mystery for school kids to work on in their spare time: Why is it that if you write any four numbers, each lower than the other, then reverse them and subtract from the original four, reverse the answer and add to it, your final answer will always be 10,890. For instance take 4,221, subtract the reverse 1234, leaving 3,087, then reverse this making 7803 and add to the 3087 and you have 10,890. Try it with any series of figures where the first amount is composed of each figure lower than the other from the left to right and you will get the same result.
